

Eddie Stobart

"We have been working with Active Fleet Solutions since the beginning of the year and already we have noticed significant savings with regards to our outlays for road traffic accidents.

The third party intervention process is extremely well organised and efficient with the high proportion of third parties accepting intervention through AFS on our behalf to be higher than anticipated. This can only be down to the friendly, professional approach used by their highly trained staff.

Their Activenet System is clear and transparent in terms of information with daily updates on the process of the third parties repair and hire process.

Active Fleet Solutions are also extremely well set up to recover any uninsured losses incurred as a result of a non-fault accident.

I would have no hesitation in recommending Active Fleet Solutions for both their professional approach and friendly reliable service which has bought us numerous letters of appreciation from third parties detailing how Active Fleet Solutions have handled the whole process from the initial accident, arranging hire for them and collecting, repairing and returning their vehicle with an exceptional turn around time."
